The Freddie Steady Revue-Dandy

Texas Music Hall of Famer Freddie Krc has made every kind of music for decades in Texas, from the power pop of the mighty Explosives to the folk rock of The Shakin' Apostles, from the hard country of Freddie Steady's Wild Country to the rock and roll of the Freddie Steady 5, from the redneck rock of the Gonzo Compadres to the personal singer/songwriter musical statements recorded under his own name.

Now it's time for his latest personal venture that—like all the best Texas music—defies tidy categorization. Recording now under the all-encompassing umbrella of The Freddie Steady Revue, Freddie brings great new songs into the mix along with some new recordings of his best songs of the past.

In the new column are the gentle rocker “Bohemian Dandy” and the just-for-fun country barbecue tribute, “Chopped Beef.” In the renewed classic column are the murky blues-driven “I've Been Framed” and the reflective ballad “Walk Tall.”

After plenty of years, miles, and music, Freddie Krc is still salty as the sea, sweet as sugar candy, and musically ready to be your Bohemian Dandy.
